Open Data Mandate: Who, when, why?

This workshop will introduce researchers to the federal agency mandate to share data connected with any agency grant funding. We will explore who this affects, when you must be compliant, and why the government is mandating research data be made available to the public. This workshop is recommended for anyone with federal agency research funding.

Put our AV Studio to work for you!

Put the AV Studio in the MaxxSouth Digital Media Center to work for you this semester. The AV Studio is a reservable space designed to allow you to quickly and easily record audio or video presentations. The studio is set up so you can walk in with a jump drive and with just a few mouse clicks can record professional video of a lecture or other presentation.

Patrons may likewise easily record audio files using the dual microphone setup.

Our new lightboard provides a unique lecture experience. Diagramming sentences and schematics, plotting and writing formulas, or even just writing out lecture notes can all be done “mid-air” while you face the camera to deliver your instruction. Draw on the illuminated glass just as you would a standard chalk or dry-erase board while recording your lecture. With a quick video edit, the video is flipped so your writing and drawings are shown in the correct orientation for your students. A lightboard is a great way to supplement lectures that require the ability to write or draw to illustrate concepts.

Learn more about the AV Studio or reserve a time to use it for yourself on our website or by calling us at 325-7676.

Welcome back, Bulldog Family!

As we start off another academic year let us do our best to help you and your students get access to the materials they need. Whether your courses are online or face to face, our Course Reserves system is a valuable teaching resource. No longer spend time making copies and passing around physical handouts. Journal articles, book chapters, syllabi, test prep materials: your students can access a wide range of electronic reserves through one simple secure portal in Canvas.

We can help you navigate proper copyright clearance, whether it be making sure your materials adhere to Fair Use standards or even purchasing access for you if necessary. For physical reserves, we are taking steps to ensure a safe and health-conscious approach in these unprecedented times.
